- Order a Brochure

Image

Honda's 2-horsepower engine is the lightest four-stroke outboard motor in the world. It delivers the power and smooth, comfortable operation your customers need in a small, easy-to-handle package. The 2 HP BF2 is extremely low-maintenance, with a transistor ignition that makes it easy to start...and a forced-air cooling system that eliminates the need for a water pump.

Play the video to see the two versions of the BF2, and the key features that make it the right choice for a wide range of customers.
